armored turret mounted fore and aft.

Such a craft, he said, would be an enigma to naval officers, who are in constant fear of torpego attack. The Captain expressed the belief that naval officers were too conservative in designing vessels and too much inclined

to stick to types the value of which had already been proved. Members of the committee asked why he did not recommend such vessels as a part of the building programme. To ent of war would be dis-instance, it was learned this Capt. Sims replied that it might be that a manufacturing considered presumptuous on his part

MAY MOVE DIRIGIBLE PLANT. Builders May Open Inland Factory

Builders May Open Inland Factory at Hartford.

Hartford.

Hartford.

Hartford: Conn. March 14.—Because Hartford is forty sales liable to attack by either air or sea invaders, it was said here to-night that probably the connecticut Aircraft Company of New Haven, which is building afteen dirigible balleons for the United States navy would erect a factory in this vicinity.

Lieutenant-Commander McCrary of the United States navy came here to-day from New London. He will be in charge of the school for dirigible pilots at Pensacola. Fla., where the D. N. 1 will be sent nex week from this city.

Sixteen members of the aviation squad special can only live long enough to conduct such a chorus I think I could die happy."

Mr. Kroneld said that his plan would furnish a means of livelihood for the men and at the same time do a great deal for the upilify of the Bowery and the men themselves.

"When a man loses his money, his position and his friends," he said, "he has not always lost his soul, and as long as he has that there is hope for him. There is a much opportunity for finding talent and ability among the unfortunate men on the Bowery as among any other class. If I am given the opportunity I will show the world how God's own chillenges and the men themselves.
